Phila., Pa.

Solenberger, A.K.

November 24, 1904

(I am a collector in antiques
and all kinds of relics..)

The first of these is the
 fact that the population of
 the world is increasing
 rapidly. This is due to
 a number of factors, including
 improved medical care, which
 has reduced the death rate,
 and the fact that people are
 living longer. This has led
 to a rapid increase in the
 number of people living on
 the earth. This is a problem
 because it means that there
 are more people competing
 for the same resources. This
 can lead to a number of
 problems, including a shortage
 of food, water, and other
 resources. This is a serious
 problem that needs to be
 solved. One way to do this
 is to improve the way we
 use resources. This means
 finding ways to use resources
 more efficiently. This can be
 done in a number of ways,
 including by using less energy,
 using less water, and using
 less land. This is a challenge,
 but it is one that we must
 face if we are to survive.
 Another problem is the
 fact that the world is becoming
 more and more crowded. This
 means that there are more
 people living in the same
 space. This can lead to a
 number of problems, including
 a shortage of housing, a
 shortage of jobs, and a
 shortage of resources. This is
 a serious problem that needs
 to be solved. One way to do
 this is to find ways to live
 more sustainably. This means
 finding ways to live that do
 not harm the environment and
 that do not use up resources.
 This is a challenge, but it is
 one that we must face if we
 are to survive.

Solentinger
